Experiences

Dailymotion

Senior Windows Software Engineer

Paris, France

11/2016 – Present

My responsibilities are to own the whole Windows Platform. This includes managing the Windows application roadmap, its release process (applause testing, etc), its architecture and the development of the application.

- Senior Software Engineer, on the Windows Platform (Desktop/Mobile/Xbox One/HoloLens)
- Managing all aspects of the software development lifecycle, from the design to release
- Helped Identify opportunities, identify risks and set priorities for the projects roadmap
- Released dailymotion SDK for Windows and Xamarin (native IOS/Android & forms) for partners
- Proof of Concepts using Xamarin Forms for TV and Mobile

Dailymotion

Windows Software Engineer – (Mobile, Desktop, Xbox One)

San Francisco, CA, USA

04/2014 – 11/2016

- Developed one application that runs on all Windows 10 platforms.
- Developed the Windows 8.1 application, the Embed Player and the Windows Phone 8 application
- Maintaining/updating our .Net API SDK , Support OEM Partner for UWP, GraphQL API

Environment: SCRUM using JIRA, Universal App, C#, XAML, LINQ, TFS and GIT, JSON, RESTful Api

Prêt d'Union

Software Engineer

Paris, France

10/2012 - 03/2014

- Lead on implementing a new financial transaction mechanism using an event-driven architecture allowing peer to peer funding (data recovery and formatting, migration to new system and implementing/developing the new system)
- Back and Middle end development, developing BI modules for the marketing and commercial team. Improving Database performance (compiled query, adding indexes, creating views, adding relationships, refactoring old code etc) Unite Testing using MSTest (TDD)
- Implemented Event sourcing (ES) and Command Query Responsibility Segregation (CQRS)

Environment: C#, ASP.NET, HTML/CSS, Entity Framework, LINQ, SQL Server, JQuery, WCF, Console Applications, TFS 2012
